PROFESSIONAL SUMMARY

I focus on creating quality products to further the interests of the companies I work for. My history of success includes developing a Full-Stack Cross-Platform App for both Apple and Play store, also designing and developing Wordpress sites from scratch both front and back-end.

KEY SKILLS

- Javascript
 - WordPress
 - Divi Theme
 - Firebase Integration
 - Github
 - MJML Framework
 - Theme Development
 - PHP
 - React Native Development
-

RELEVANT WORK EXPERIENCE

- Technology Dept.** – GADSDA, Mountain Dale, NY 05/2018 – Present
- Responsible for all Technological needs such as web and app development.
 - Developed company app ([VTH Writings](#)) both for the Apple and Google Play Store.
 - Developed company website (shepherds-rod-message.org) with WordPress
 - Responsible for producing, editing and uploading video content to social media platforms.
-

PROJECTS

- Barnet Dental** – Wordpress Custom Theme 04/2024 – 06/2024
- Has 5 Custom Post Types (Dentists, Events, Locations, Procedures, Testimonials)
 - Contains many Custom Routes to facilitate custom content being delivered efficiently
 - Integrated with [Leaflet.js](#) for interactive maps.
 - Responsive to Mobile and Desktop Devices.
 - All Search functionality is powered by vanilla javascript.
 - Used the Advanced Custom Fields plugin to create unique meta-data for each custom-post type.
-

- VTH Writings** – Mobile Application ReactNative.js 05/2023 – Present
- Offline and online search capabilities powered by Minisearch.js library.
 - Cross-platform full-text search application with audio playing capabilities.
 - Available in [Apple](#) and [Google Play](#) store.
 - Online search and all money transactions are powered/processed by Node applications I built and deployed to Heroku.
-

- Shepherds-Rod-Message** – WordPress Divi Theme Website 08/2023 – Present
- Integrates with a Node.js application I built using the AuthorizeNet Gateway sdk which handles all transactions.
 - The backend incorporates Nodemailer.js which facilitates the immediate emailing of receipts to all transactors.
 - With PHP I enhanced the search feature categorizing the search results enabling users to filter them by category.
 - Incorporates an LMS Plugin to facilitate users that want to know more about the Organization.
 - Created all receipt templates.
-

- Email Templates** – MJML Framework 08/2023 – Present
- Created Email Templates based on companies such as [Western Union](#), [Babbel](#), [Swanson](#), [Fiverr](#), [Paypal](#), [Walgreens](#), [New York Times](#), etc.
 - Most Templates were made using the [MJML framework](#).
-

- Artzibition** – ThreeJS Virtual Auction Website 10/2023 – Present
- All 3D models were built in Maya.
 - I used [Three.js](#) to build this experience.
-

EDUCATION

- [The School of Visual Arts](#) SVA 2013
- **Major:** BS Computer Arts
